Summary

Front-End Developer employing a background in teaching to find creative solutions to coding challenges with skills in JavaScript, React, SQL, and more. Always looking for solutions as a relentless problem solver and consistently looking for the best responsive designs. Excels working in teams where communication is a top priority. Excited to learn new stacks and share learning with others. As a part of a high-quality team, created a web application that allows people in Austin to post and RSVP to events. Excited to be a part of a fast paced and driven team to ensure the world continues to run smoothly. Best traits are analyzing complex problems, communication, self-directed, and teamwork.

Technical Skills

HTML | CSS | JavaScript | Node.js | Bootstrap | jQuery | Tailwind | React | Express.js | Sequelize | MySQL | MongoDB | GraphQL | RESTful APIs | Web APIs | UI/UX | Agile Development | Object-Oriented Programming | GitHub | Certificate of completion of the Coding Bootcamp at The University of Texas at Austin
